**IN THE INTERESTS OF ECONOMY, DELEGATES ARE KINDLY REMINDED TO BRING  
THEIR OWN COPIES OF THESE DOCUMENTS TO THE MEETING**

# Stakes representation of the French marine space

**Marine mammals**

- no data
- minimum specific diversity
- maximum specific diversity

**maximum specific diversity**

**economic exclusive zone**

**ecologic protected zone**

- sources :
- en Atlantique Nord-Est - bases de données PELGAS et ATLANTET (CRMM)
  - au large du Cotentin (GECC)
  - en Manche Occidentale (GMN)
  - au large de la Bretagne (Océanopolis)
  - en Méditerranée (GREC)
  - Observations de Requin pélerin recensées à l'échelle nationale (APECS)

methodology :

Raw data were aggregated by calculating the specific variety on a 10 x 6,7 nautical miles mesh size.

**It is advisable to consider the specific variety translated by this map with precaution as far as the transmitted datasets differ by a not homogeneous pressure of observation and a period of sampling.**

coordinates system : WGS 84
