

3.5 Workshop on management of MPAs for small cetaceans

The screenshot shows a Miro board titled 'ASCOBANS WS'. The board is organized into several sections:

- Orientation:** Includes slides for 'Technical stuff', 'Agenda', 'How we work', 'Parking lot', 'Coffee machine', and 'About us'.
- Day 1 (18 MAY):** Focuses on 'Examples of ambitious, well-formulated conservation objectives'. It includes slides for 'Introductions', 'Ambitious cons. objectives', 'Well-formulated cons. objectives', 'Prey', 'Human pres...', and 'Day 1: Ev...'. A 'LUNCH 12-13 CEST' slide is also present.
- Day 2 (7 JUNE):** Focuses on 'Conservation measures, part 1'.
- Day 3 (8 JUNE):** Focuses on 'Conservation measures, part 2'.
- Closing:** A 'CLOSING' slide.

The board also features a 'Reviewing, incorporating feedback, Presenting' process flow and a 'SMART' acronym diagram. A vertical toolbar on the left contains icons for navigation and editing. The bottom right corner shows a zoom level of 5%.

Aims:

- Conservation objectives examples
- Toolbox of conservation measures
- Report will be available after summer

3.5 Workshop on management of MPAs for small cetaceans

miro ASCOBANS WS

DAY 1 18 MAY: Examples of ambitious, well-formulated conservation objectives

Introductions

Find your group's area below.

In the breakout group, introduce yourself and tell a brief story of an experience that made you realise you want to work with cetaceans. Alternatively, just a happy memory that has to do with cetaceans.

Write a couple of keywords from your story onto one note with your name. Example to the right.

12 minutes

End result: you know some of the other participants and feel more comfortable with Miro

Ambitious conservation objectives: Brainstorm BHAGs - Big Hairy Audacious Goals

On your own, think of a small cetacean MPA. What would be a Big Hairy Audacious Goal (i.e. conservation objective) a species for that MPA? The BHAG must reflect something that the species needs in that particular site.

Look at all the seven themes, contribute wherever you can. What is a Big, Hairy, Audacious conservation objective when it comes to the species' attributes? What Big, Hairy, Audacious objective serves that species in that MPA in terms of habitat quality, noise, etc.?

One draft objective per note.

Quantity over quality.

Use others' ideas as inspiration.

No criticism!

15 minutes

End result: a bunch of BHAGs for each theme

Possible keywords

Equipment, Mortality, Population, Regulation, Zoning, Awareness, Methods, Enforcement, Technology, Access

Big Hairy Audacious Goals: Species

Big Hairy Audacious Goals: Bycatch

Big Hairy Audacious Goals: Noise (impulsive/acute/continuous/chronic)

Big Hairy Audacious Goals: Environmental context

Big Hairy Audacious Goals: Prey

Big Hairy Audacious Goals: Habitat quality

Big Hairy Audacious Goals: Presence of other species
